

The new 4G phones from Kyocera are now For Sale! There are three configurations as listed below. They can be activated on any new or existing Verizon, Verizon Pre-Paid or any other Pre-Paid provider on the Verizon network. It should also work with AT&T or Sprint SIM card (but not likely 4G service on non-Verizon Carriers). These phones have been tested by qualified personnel and do not have access to Email or Internet and cannot be factory re-set to the original configuration.

These phones are a stock Kyocera phone, which has been re-flashed by the manufacturer to eliminate Email and Internet access and to block any type of factory re-set options which would bring back the unacceptable configurations.

These phones come with an original two year factory warranty from Kyocera direct.

When you receive your phone, the model and configuration number will be on the outside of the box. There is also a tag under the battery cover with configuration number on it. On the menu, under the notifications, the model, configuration number and certifying organizations are listed. All of these denote a modified phone. Please use the attached Order Sheet to enter your purchase request.

Nesher - Configuration #1
